

ARENDA ELITA VON WOLSKY FF
338 A.C. ROMA

Tallinn, June 17th 2020.a.D.

Basis and Establishment Principles of Academia D'Arendia

To the representation of Arendia Elita von Wolsky Family Federation (AEvW FF) belongs family's Kistler-Ritso previous elder Swiss origin Walter Paul Kistler together with his lady Olga Kistler-Ritso until 2015, who often visited Estonia. Aunt Olga Kistler-Ritso of AEvW FF Principalia Marika Katarina Arendia Elita von Wolsky felt a great debt of gratitude towards the indigenous people of Estonia, because they had her, as an orphan, taken care of at age of two together with 6-years old Marika Katarina's father Aleksei Ritso to their homes from Moscow streets.

Olga Kistler-Ritso graduated from Tartu University in 1944 and left to Germany, where she started work as eye surgeon and pediatrician. In 1960 she got married with Walter Paul Kistler in Switzerland. Daughter Sylvia was born in Buffalo USA in 1961, who got married with British origin USA grand entrepreneur Andrew Markham Thompson.

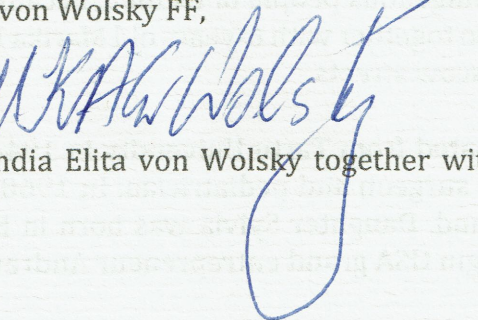

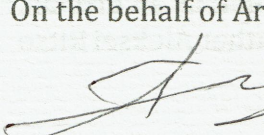

Olga Kistler-Ritso felt deep sympathy towards the severe history of the indigenous people of Terra Mariana, evaluated their diligence very highly, but especially willingness and ability to learn. For the memory of 800 years lasted suffering Olga Kistler-Ritso presented to Tallinn and to the whole Estonian nation Occupations' Museum Vabamu. Olga Kistler-Ritso has been recognized with the Clarissima Domina decoration of Ordo Altaria Mariana in 2001.a.D., with the Estonian Red Cross II Class decoration in 2001.a.D. and Tallinn Sign of Coat of Arms in 2005.a.D.

There is a reason to believe, that Walter Paul Kistler, driven from love of his lady towards the indigenous people of Terra Mariana, invited Principalia of Arendia Elita von Wolsky FF Marika Katarina to represent his foundation established in the USA, *Foundation For the Future*, in Tallinn and in the whole Europe, from what according to his will should have been developed the USA Astrophysics Institute in Europe and in the next dynamics Walter Paul Kistler saw wide-based over-politics and between religions education and scientific centre, simple and logical like Platon Academy in Athens. Unfortunately I have to confess that before calling Walter Paul Kistler to Heaven we reached to the only astrophysicist recognised with the academic degree, graduated from the State University of Moscow (Cum Laude), obtained the Doctor's Degree in Mathematics-Physics at the same place, Ene Ergma, member of the Academy of Sciences of the USSR and professor, Vice-President of the Estonian Academy of Sciences in 1999-2004, in the years 2003-2014 she was the President of the Estonian Parliament. To our application she answered understandably that she has already become rusted for science and tries to survive only in politics now or something this. Hearing this, Walter Paul Kistler considered, that he tries to find assistance from Stanford University, where two denominative auditoriums are dedicated to his memory.

I am guilty and confess, how I have not been able to evaluate time while the key persons of our undertakings have been together with us in here-side. I hope that You understand why this piece of writing is carried so much from the IM MEMORIAM mind. But I have noticed in practice, that the academic society is better organised today and more awarely integrated on the international communication level. This is the effort of one non-academic kinsman to try once more.

Hearty educated successors of Terra Mariana and the whole my academic concord, come to help us as the commemoration is important for us.

On the behalf of Arendia Elita von Wolsky FF,

Protector Generalis Ioan Arendia Elita von Wolsky together with his Lady, Principalia Marika Katarina
