

Reflection about Eugenics in Time and Eternity

One piece of writing not published until now

From our Lord's year 2015

Thanks to taking into account the age features, I have discovered totally new qualities during adjusting my biological time. Good co-thinker has probably discovered those values already or only reaching to this kind of delight, i.e. delight from knowledge that only everlasting life can be more beautiful than life. In the process of realisation of this simple truth occur some sad tones as-well.

The first time I relinquished from trip to Italy without visible reason in these days, where my beloved lady Marika is in mission right now. I feel that this kind of relinquish hardens me towards Everlasting town and the whole Italy. I am proud about my trained brother, Haljand Udam, who let himself to invite to heaven just in town Rome. The reader remembers that I have been 24 times to Italy already and believe that my Heavenly Father wishes, that I would do it for many times more.

Three days in Brussels where I was invited the first time, do not console me at all. Brussels considers itself the IV + Rome besides Washington. But it seems ...

2.

The next reason why I have stepped aside from our communication, good co-thinkers, is the fact that the publisher of my current reflections in

Germany has roughened the agreement conditions. The present reflection is so called private pleasure while thinking about countrymen and is not thought for selling. Skilled publisher has decided to legend me, to write into the history this way - haa!

I feel that I have reached the format where the temporary time is used less than ca 10%. In this time-space here I have had chance to follow also Chinese supreme doctrine being our Lord's humble student - primarily in the context of comparative theology of course. One fine Chinese-Estonian friendly investor, who is also the president of International Chinese Friends association in Hong-Kong has decided to register to our Family Federation Estonia-China International Friendship Association in Tallinn besides Confucius Institute.

3.

Meanwhile I have been invited by good Terra Mariana sons to have the honour to be honourable Magister Generalis at an order waiting for Pope's sanctification. It is the first brotherhood of indigenous people in the Holy Terra Mariana after 800 years of freedom battle. Wisely low profile has been held before Pope's sanctification. Let us pray for those good brothers that their enthusiasm could also find the Pope's confirmation. Finally, there is the third ordeal where Our Father has given me to the test. I have become a guinea-pig in the clutches of eugenics of the USA and Russia.

For obvious reasons, after the II World War, a lot about eugenics was not spoken publicly. For the fortune, anyway the innocent child was not totally thrown away with the Nazi ideology washing water. Necessary genealogic studies were continued more than a half of a century and only the possibilities of DNA era have established a irrefutable basis, from where again became possible to step to the public in the results of research. Unfortunately, the results of research are not delivered with guinea-pigs. My reflections EUREKA EUGENICS can bear only a popular scientific value.

4.

This way could be summed up overview about my activities in the period while I did not share my thoughts with You. I believe that You understand and forgive this way that we could start to contemplate again.

Welcome to the reflections!

Being subjected of the Holy See, I line up in my thoughts primarily to the hug of eternity values of our Lord's vice heavenly wise invitation. Our Pope Franciscus I became elected to the post of the Holy See by the highest Conclave in Holy Spirit in front of the self-destroying end of liberal-democratic dictatorship, to give once more time to come back under the defence of Holy Doctrines. Wicked tongues have named Holy Pope Vatican Lenin for bringing the theocratic socialism heavenly word and act to the world and named the

whole Vatican Smolny. I ordered an evaluation about the human development of our Planet from more known honest and public socialist at the place. The research of the jurisprudent socialist is seen here - http://www.terramariana.ee/web/?%DChiskond:Teokraatliku_sotsialismi_kontseptsioon . I am not given the right to judge, but I know that besides monastery communes' communism solidarity ideology is spread in Catholic communities, where private property is untouched indeed, but solidarity requirement is taking place and regulated, as it was in force for Antique Rome already and is survived as in Judaism as-well in Islam. Statistics says that the economic figures of 250 Kibuts are higher than the mean of state Israel.

5.

I have enjoyed myself with the thought that if to indicate to the thousands of NGOs, who call themselves orders, that in a real order it is necessary to give also poverty vow, that means it is necessary to give up private property for enjoying about joint property etc.

I got closely acquainted at the place with some years ago re-established Mariengild (Mariengild anno 1407) look www.TerraMariana.ee heading Religion. Very pleasant company of the Holy See subjected at the place. Mary Earthmen have been good builders, handicraftsmen etc. not depending of their rank through times. Is it a very natural position choice for today's makers, isn't it? Without any bluff reestablishment of legitimacy for the honour of previous and future masters and for delight to God and his population. For me,

as a foreigner at the place, is it not understandable indeed, why indigenous, whose genetic memory's lover back should still remember salve wickers, want strongly to play knights' games, i.e. try to step to the side of occupant slave owners. It is said that not a single slave likes another slave and always to wear owner's trousers is wanted. I hope that I am wrong that after 800 years of freedom fighting is anyhow reasonable to wear trousers as the owner has. Anyhow, the Mariengild brothers have made a very natural choice to be more than seemed.

6.

Spread is knowledge that blue-blooded enjoy they're dying out. More exact could be to say that with this knowledge is equipped the whole first rank and not only. Theoretically all people of God are aware of the knowledge about temporary life in the eternity, but in practice anyhow only selected, that means all are invited, but not all are selected. Once more: God's paths are not inexplicable, but His grace is infinite.

Those who know that they have been always, are now and come again, also know in practice that the everlasting life is higher than life. Freedom to live in timeless time presumes privileges also in temporary activities. But if the time is not this way at the time, then it would be just time to spend simply time until the heavenly leadership could be needed again. The seeming dying out means that less time is spent to the temporary things and eternity time is delighted more. There are strict rules in the eternity hierarchy: if not to fall,

the demand of giving up from choice freedom is in effect. Knowledge about giving up freedom of choice is the general privilege to eternity people.

7.

Level work according what we qualify to the eternity hierarchy in our eregor, is based on the knowledge of my level of knowing, that there is not anything that we do not believe, there is only what we believe and right that is what it is. My level's supreme privilege is to be student of our heavenly Father.

Your brother, Humble student of God, Ioan together with my lady Marika Katarina
